

Magnum PS14P

4-Port PoE Power Source Switch

Features

- Four PoE ports in a small heavy-duty Ethernet switch
- The switch and attached PoE devices are powered from an integral -48V DC terminal block
- Temperature rating of -40°C to 75°C handles heavy duty applications
- RJ-45 ports support standard auto-negotiation and auto-cross to enable attaching any 10 Mb or a 100 Mb device, regular or PoE
- Same package and DIN-Rail mounting options as the S14P Convenient Switches

The Magnum PS14P combines PoE with a small -48VDC heavy-duty Ethernet Switch

The Magnum PS14P offers four Ethernet connections and a terminal block for -48VDC input

The Magnum PS14P may be easily DIN-Rail-mounted (shown with model DIN-RAIL-MC2)

PS14P is available with panel mount brackets (bracket enlarged on left)
